HOW I AM

I am a junior full-stack developer with a creative mind and a natural proclivity for problem-solving. My ambition is to consistently grow and evolve in the field of web development. I am always on the lookout for opportunities to acquire new skills and refine my abilities to provide innovative and cutting-edge solutions. I am determined to contribute to projects that fully leverage my capabilities and allow me to consistently push my boundaries.

LANGUAGES

Italian - Native
English - Basic

SKILLS

Solid skills in HTML, CSS, and JavaScript. Practical experience in developing modern user interfaces using technologies like React.js and Redux Toolkit. Advanced proficiency in implementing RESTful APIs and knowledge of SASS for style optimization. Familiarity with Node.js, Express, and Next.js for building scalable servers and dynamic web applications. Knowledge of MongoDB for data management.

EDUCATION

ITI ENRICO FERMI

High school with a focus on computer science

EPICODE

Intensive Full Stack Developer Course

WORK EXPERIENCE

Specialized VAS Technician | 2020 - Present

Specialized technician with expertise in installing fiber, copper, and Fixed Wireless Access (FWA) systems. I also handle the configuration of devices to ensure smooth internet browsing. Thanks to my experience, I excel in quickly troubleshooting issues and providing technical support to clients, ensuring uninterrupted service. I have honed skills in maintaining advanced communication infrastructures and assisting customers.
